

Diksh Sawaliya

Gurgaon, India · +91 88008 69633 · diksh101sawaliya@gmail.com

Summary

Senior Android & Cross-Platform Engineer with 3+ years building production apps across travel, fintech, retail, and networking domains. Shipped an AI-powered SDK with voice recognition that reduced integration effort for cross-platform teams. Strong in Kotlin, Jetpack Compose, MVVM architecture, and React Native. Proven track record of improving app stability and performance in apps serving millions of users.

Experience

Hughes Systique Corporation · Engineer

Jan 2023 – Present · Gurgaon

- **Architected and shipped an AI-powered voice recognition SDK** with a React Native wrapper, cutting cross-platform integration time by ~40% for partner teams across 3 domains
- **Reduced app crash rate to 99.4%+ crash-free sessions** on Yatra.com Android by implementing structured Firebase Crashlytics alerting, targeted ANR fixes, and proactive memory leak resolution using LeakCanary
- **Led barcode scanner SDK integration** for Denso retail hardware, achieving <200ms scan-to-result latency and full device compatibility across 5+ hardware SKUs
- Built scalable MVVM architecture with Coroutines, Flows, and Repository Pattern across 4+ production apps — reducing codebase coupling and improving feature delivery speed
- Automated regression testing with Selenium + Appium, cutting manual QA cycle time by ~30% and enabling CI-gated deployments
- Delivered animated, high-performance UIs using Jetpack Compose and Reanimated for apps with 100k+ active users, maintaining 60fps rendering on mid-range devices
- Integrated RESTful APIs via Retrofit, OkHttp, and Axios with real-time Firestore sync, supporting live data flows across travel and networking products (LEO)

Shortgun · Game Developer

Jun 2022 – Dec 2022 · Mumbai

- Developed a zombie survival AR game for Jio Glasses using Unity + Jio SDK, delivering immersive gameplay optimised for constrained XR hardware

CSKAA · AR/VR Developer

Jun 2022 – Sep 2022 · Noida

- Built a Meta University virtual education environment and a 3D Car Visualizer with realistic rendering — shipped to internal stakeholders on schedule

Huawei · Android Developer Intern

Jun 2021 – Sep 2021

- Developed and **published GettingRipped fitness app on Huawei AppGallery** end-to-end using Huawei HMS Core, gaining hands-on deployment experience

Skills

Languages: Kotlin, Java, TypeScript, HTML, CSS, XML

Android: Jetpack Compose, MVVM, Coroutines, Flows, Room, WorkManager, Retrofit, OkHttp, Realm, Firestore

Cross-platform: React Native, Redux, Zustand, Reanimated, Axios

SDK & Infra: SDK Development, Voice Recognition, Barcode Scanner Integration, Firebase Crashlytics, Gradle

Tooling: Android Studio, Git & GitHub, Postman, Figma, Selenium, Appium, REST APIs

AR / XR: Unity, Unreal Engine, Jio SDK, Meta VR

Education

B.Tech, Computer Science · The Northcap University · Jul 2019 – Jun 2023
